# 1

Download the base files (laser & handle)

Choose the accessories you want
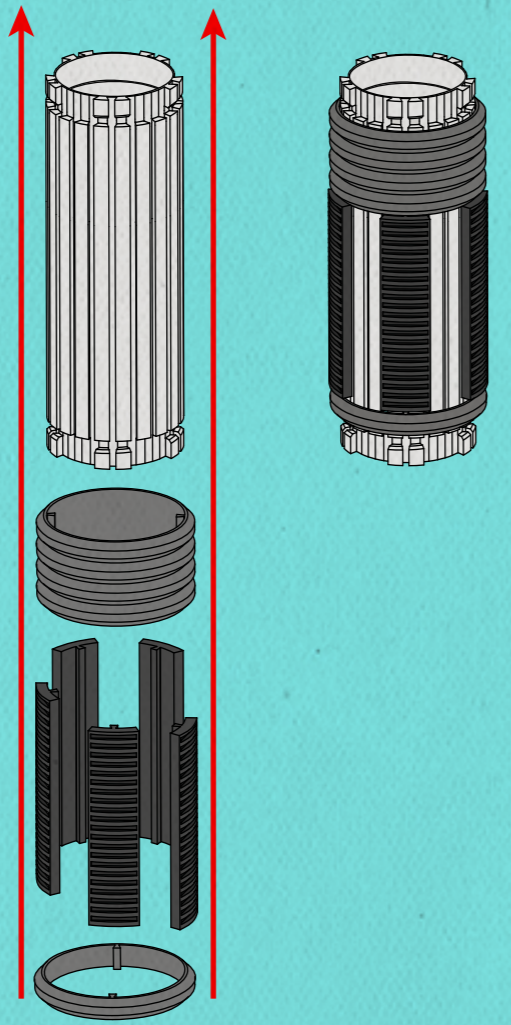

**Use your favorite filament colors.**

2

Customize you saber's handle by sliding the accessories into the slot *

* Cut or smooth the edges if necessary.

3

**Insert the laser inside. Screw the top and the bottom of your saber ***

This edge inside has to be on the top to have the good direction
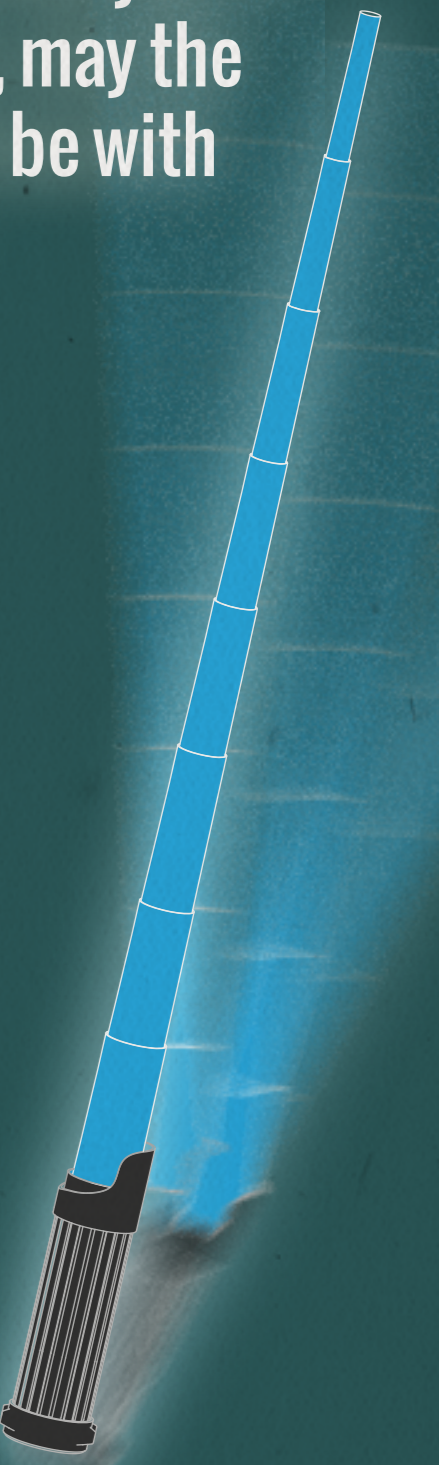

* Cut or smooth the edges if necessary.

4

Choose the ''connector'' part instead of the cap to have a bigger saber or have a double saber !
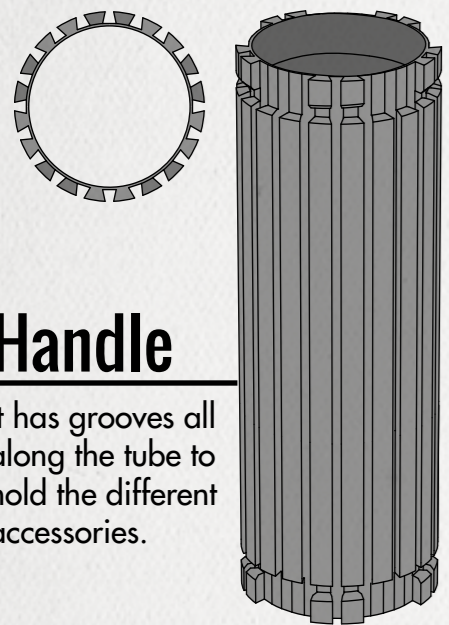

Screw the connector
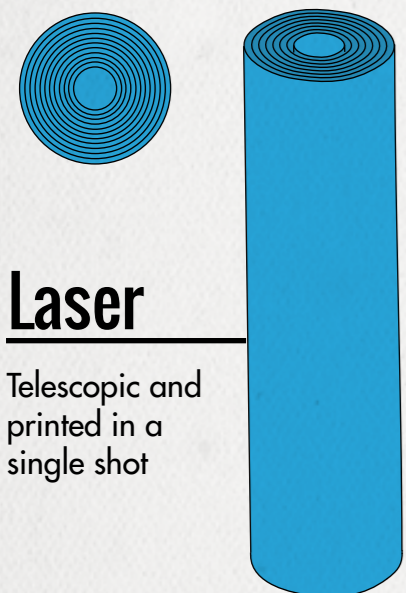

5

Now that you're done, may the force be with you.

Base

Handle
It has grooves all along the tube to hold the different accessories.

Laser
Telescopic and printed in a single shot

Handle parts

Four rings

Single ring
So you can juxtapose and alternate the color.

Large Grip
Print it **5** times to have a complete grip handle.

Little Grip
Print it **10** times to have a complete grip handle.
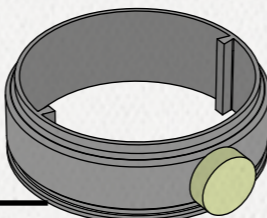

Belt Clip
So you can hang the saber on your belt

Double Control button
The ring and the buttons are printed separately and clipped together.
Advice : print it twice with different colors and mix the parts to have a color contrast.
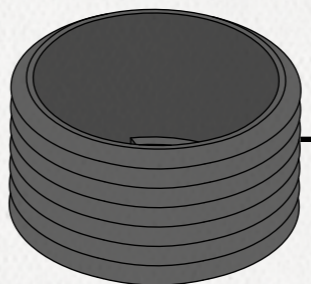

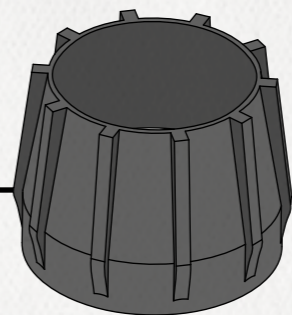

Single Control button
For minimalist jedi who only wants the essential

Top

The Classic top

## Sith top

Grooves top

Vader top

Skywalker top

Bottom

Connector
Use it to connect two handles. Can also be used as an end bottom.

Closing cap
Use it to close the bottom of your saber
